Play. Learn. Grow up Green with Gibby!

After a fun day following gibbons in the jungle, Dr. Jackie has collected samples of everything the gibbons ate. Now it's time to categorize the data!

Count how many items Dr. Jackie collected for each food.
Write your answer below. Which food did gibbons eat the most of?
Add the items together to find out how much food the gibbons ate today.

Leaves

Figs

Termites

Flowers

About the Book

After chasing a butterfly through the jungle, Gibby suddenly finds herself very far from her family and lost. Using her courage, confidence, and some clever teamwork, Gibby makes new friends on her quest to find her way home to the Frilly-Fig Tree.

But with danger lurking in every direction, will they make it to safety before the sun sets?

Dr. Jackie & Gibbons

After more than a decade of trekking through the jungle studying monkeys and apes, you can bet anthropologist and primate expert, Dr. Jackie has got a few good stories to tell about what life is *really* like in the jungle!

Using cartoon versions of REAL animals and nature, Dr. Jackie's new children's book series combines her years of expertise in teaching and primate research with her knack for wordsmithing rhymes, bringing the wonderful world of gibbons to life for kids.

Each book teaches an important lesson on curiosity, teamwork, problem-solving, resilience, empathy, integrity, and self-confidence - all while rocking and rhyming in the heart of the jungles of Asia.

Every character in the Gibby's Great Adventures series has a real-life cousin in the wild, fostering valuable connections for kids with nature, conservation, and the importance of protecting wild endangered animals in the jungle, through the magic of great storytelling!

A charismatic and inspiring champion for nature, Dr. Jackie is available for keynote speaking, school talks, and hosts educational, eco-friendly "Rainforest Wisdom Workshops with Gibby" for kids ages 5 through 9.

**"This wonderful book!
Gibby's Great Adventure is a book
like none other."**
